

# ally

The ally is a handy side table that can also serve as a stackable shelving unit. The airy frame is grounded with a warm solid walnut base. The walnut shelf can be attached either on the top of the frame to create a table surface, or inserted into the base as a shelf landing. The ally is available with a powder-coated aluminum frame or double-sided mirror polished stainless steel frame. The powder-coated frame is available in a glossy white and glossy black. Any RAL colors can be requested for a custom application.
